BT TRADING CLOUD: GLOBAL, RESILIENT & FUTURE-READY

To meet the demands of modern trading environments, BT Trading Cloud delivers secure, low-latency voice trading, command, and control on a modern cloud foundation—combining the scale of Microsoft Azure with BT's proven expertise in mission-critical communications.

A secure, low-latency, globally connected trading platform built for regulated markets.

Secure by design
Protect your trading operations with end-to-end security across network and cloud infrastructure, reducing operational risk and supporting compliance requirements

Built for regulated trading
Operate with confidence in highly regulated markets, with a platform aligned to financial compliance and operational resilience standards

Low-latency performance
Execute trades and communicate in real time with optimised, high-performance connectivity designed for time-critical environments

Flexible and scalable
Scale globally at pace with a subscription-based model that enables rapid deployment without the constraints of legacy infrastructure

Always current (Evergreen)
Stay ahead of evolving market and security demands with continuous updates and innovation delivered as part of the service

Global Deployment for Resiliency and Data Sovereignty
Dense global PoP coverage, high availability architecture, and multi-region failover built into the platform throughout the globe including US, UK, Europe, Switzerland, South Africa, Asia-Pac, Australia, India and Japan ensuring resiliency and data sovereignty

BT Trading Cloud enables financial institutions, energy trading firms, and control room operators to modernise their communications environments while maintaining control, compliance, and performance.

With BT Trading Cloud, you can:

- Modernise legacy voice trading infrastructure without disrupting core workflows
- Accelerate digital transformation across trading floors and control rooms
- Enhance collaboration between traders, counterparties, and clients
- Improve operational resilience in the face of market disruption and regulatory change

BT Trading Cloud provides a dedicated cloud architecture that allows institutions to control their own upgrade cycle, operational roadmap, and environment without being tied to broader community-driven infrastructure changes.

Why work with us?

Leading organisations across the global trading ecosystem trust BT Trading to deliver uncompromising performance, resilience, and compliance—standards demanded by the world's most complex and mission critical environments.

Our versatile offering supports energy, logistics, and industrial sectors, Investment and asset management firms as well as exchanges and market infrastructure providers.

Our customers benefit from:

- Proven capability in the most demanding and regulated environments
- Deep expertise in both trading floors and control room operations
- Flexibility to support modernisation while maintaining operational continuity
- A consistent experience across a range of deployment models
